EDUCATION

Guru Gobind Singh Indraprastha University

B.Tech in Information Technology (CGPA: 8.8)

Delhi

July 2019 - Aug 2023

WORK EXPERIENCE

LEARNYST

Technical support engineer

Bengaluru, India

Feb 2025-Present

ACCENTURE

Package app development associate

Gurugram, India

May 2024 – Sep 2024

- Completed in-depth training in JAVA Full Stack Development, mastering both front-end and backend technologies.
- Gained hands-on experience with industry-standard software tools and platforms, improving proficiency in professional development environments.
- Developed strong skills in JAVA programming, including core concepts, object-oriented programming (OOPs) principles, and application development frameworks.

TO THE NEW

Software engineer trainee

Noida, UP

Feb 2023 – May 2023

- Java Spring Expertise:** Developed applications using the Java Spring Framework, including Spring Boot for RESTful APIs, Spring Hibernate for ORM, and Spring Security for authentication and authorization.
- Build & Dependency Management:** Utilized Maven for build automation and dependency management, streamlining project setup and ensuring seamless integration of external libraries.
- Quality Assurance:** Implemented comprehensive unit testing with JUnit and Mockito, adhering to test-driven development principles to ensure code quality and functionality.

BASIL INFOTECH

Web Development intern

Remote

Jan 2022 – Apr 2022

- Web Development:** Designed and developed user-friendly web pages for a payment gateway, ensuring intuitive navigation and seamless user experiences.
- Frontend Technologies:** Proficient in HTML, CSS, and JavaScript, creating responsive and interactive web pages compatible across devices and browsers using Bootstrap and media queries.
- Prototyping & Design:** Used wireframing and prototyping tools like Adobe XD and Figma to create visual mockups and interactive prototypes, supporting effective design planning.

PROJECT

Vidtube Backend project | GitHub: [Link](#)

- Tech Stack: Node.js, Express.js, MongoDB, JWT, bcrypt (Backend for VidTube, similar to YouTube)
- Features: CRUD operations, user authentication, JWT security, bcrypt hashing, MongoDB integration, error handling & validation..

Smart contact management | GitHub: [Link](#)

- Efficient Contact Management: Developed a contact management application with a secure and smart way of storing and handling contacts.
- Authentication & Authorization: Implemented Spring Security for secure user authentication and authorization to ensure data protection.
- Self-Contained and Easy to Run: Built with Spring Boot, Thymeleaf, and SQLite3, allowing users to run the app with no configuration changes or additional setup.

Modern SaaS landing page| GitHub: [Link](#) | Vercel : [Link](#)

- Developed a modern SaaS landing page with Tailwind CSS, TypeScript, Next.js, and Framer Motion, featuring a visually appealing UI and engaging animations.

CERTIFICATES

Supervised Machine Learning: Regression and Classification (Coursera) by Andrew ng
